Documentantion setiap langkah/proses yang anda lakukan. Dokumentasi wajib menggunakan gambar langkah/langkah atau VIDEO rekaman proses, disertai dengan tulisan penjelasannya.

Nilai PLUS <tambahan> bila anda dapat menghubungkan dan menggunakan GITHUB dalam proses pengerjaan dan pelaporan anda , konek <masukan P. broer sebagai member group> ke github rizalbroer@uinjkt.ac.id <+10 %>

// Semua soal ini diambil dari buku Database , Coonoly. Anda di anjurkan untuk membaca naskah/text aslinya di buku tsb.
Chapter 6

Exercises

Answer the following questions using the relational schema from the Exercises at the end of Chapter 3:

6.10 Create the Hotel table using the integrity enhancement features of SQL.

6.11 Now create the Room, Booking, and Guest tables using the integrity enhancement features of SQL with the following constraints:

(a) type must be one of Single, Double, or Family.
(b) price must be between £10 and £100.
(c) roomNo must be between 1 and 100.
(d) dateFrom and dateTo must be greater than today's date.

(e) The same room cannot be double-booked.
(f) The same guest cannot have overlapping bookings.

6.12 Create a separate table with the same structure as the Booking table to hold archive records. Using the INSERT statement, copy the records from the Booking table to the archive table relating to bookings before 1 January 2003. Delete all bookings before 1 January 2003 from the Booking table.
